Measure Talk Times • Listen to Calls • Multiple Locations • Justify Ad Spend • Calculate ROI

What is Call Tracking?

Money Mailer offers the ability to track customer phone calls generated by your direct mail campaign. A unique phone number directs calls to your existing phone line. You'll be able to listen to recorded conversations, keep track of the number of calls you receive and calculate a more accurate return on your investment!

Listen to Calls

Calls to your CallRail phone number are recorded*, allowing you to listen to conversations and deliver customer service feedback to your staff.

"Hi my name is Joe, how can I help you today?"

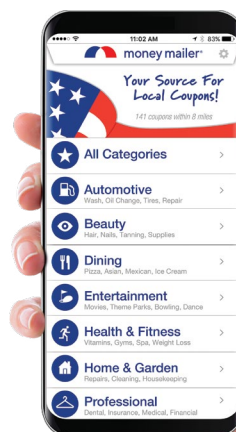

"I'd like to have 10 new windows installed this month."

Measure Response & ROI

The best way to assess your ROI is to link every lead back to the specific marketing source that drove the response—including phone calls, in-store redemptions and traffic driven to your website. Without call tracking it's not possible to see the full picture of your marketing efforts and results.

Here's an ROI calculation example using call tracking results:

Number of Calls Per Mailing	30
Average Transaction	\$500
Estimated Sales (Assume 50% Close Rate)	\$7,500
Estimated Gross Profit Margin (Assume 50%)	\$3,750
Number of Money Mailer Zones Mailed	4
Rate Per Zone	\$400
Advertising Investment Per Mailing	\$1,600
ROI	234%

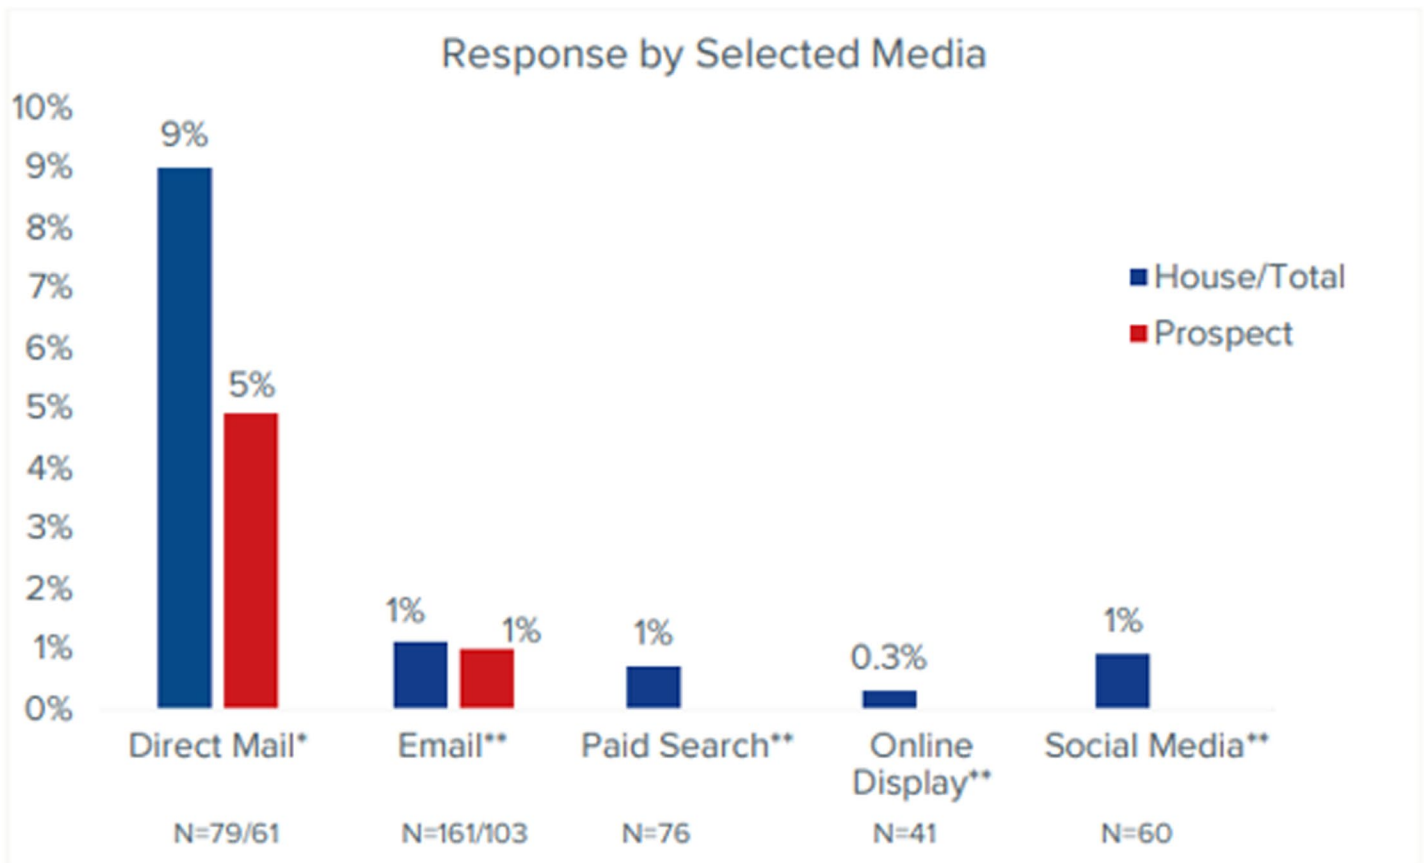

*CallRail eligibility may vary by state and by category.
